Adding 1000m<sup>2</sup> of secular spaces to this Grade II listed church with broadcast-quality acoustics involves new reception areas, one-to-one spaces, small and large meeting rooms and a vibrantly coloured music room at the back. A glazed 12m high ambulatory along one external side links the front and back of the church, opening into a sub-basement 257m<sup>2</sup> garden room for large meetings. Materials include copper, glass and marble.
