

**Celebrating a decade of Paul Vick Architects. Thank you to all those who have and continue to support us.**

**This is what we have been doing in that time.**

We have...

- designed approx. 200 projects.
- worked in Westminster and West End, Smithfield, Knightsbridge, Kensington, Chelsea, Fulham, Hampstead, Wandsworth, Ealing, Hounslow, Richmond, Bucks, Oxford, Northampton and the west country.
- brought you a 100% planning permission record with new build and listed buildings and those in conservation areas.

The...

- tiniest completed project is a new window overlooking the Victoria & Albert Museum
- largest project is a vision for the Diocese of London (covering approx 24km<sup>2</sup> from St Pauls Cathedral to Westminster Abbey)

We have had 4 offices including designing a new build and two office fit outs.

Working closely with you and being hands on, we have developed a new approach to creating and enhancing value for you [\[article\]](#). Understanding your particular needs we have worked together to bring different value approaches and future opportunities [\[article\]](#).

This resulted in winning 5 awards and being finalists for another 8. This includes 3 in the last year.

We have worked with you on theatres, schools, museums, individual settings for art, startup hubs, offices, churches, memorial space, visitor centre, whole towers, basements, bridges, new department store in west end, hotels, shops, restaurants including one in Leicester Square, photographic studio, private library, bird-viewing nest, extensions, basements, regeneration, urban realm, refurbishment, new build, low energy new and retrofit, care homes and houses...

We want to take a moment to celebrate these first ten years as we don't stop to reflect often enough. And most especially: Thank you!

**Roll on the next decade! We are hugely excited by it!**

"We are looking forward to seeing the changes made by Paul Vick and his team, and I am sure that these improvements will make a real difference to people who visit this beautiful house."

Graham Packham, chairman of City of London Corporation's Culture, Heritage and Libraries Committee

"Paul, I have really enjoyed working with you and your ideas for the floor plans and frontage design were impressive. I have also enjoyed our conversations. I appreciate your support and hope we will be able to ask you to assist...again."

Hiro Watanabe, CEO at Mitsukoshi

"Paul has listened and created an empathic and elegant solution for us, and a vision that was more than we had hoped for. I believe that the proposed development will help ensure that St Paul's has a flourishing role in the future."

Fr Alan Gyle, vicar at St Paul's Knightsbridge

"I didn't know design could do this."

Low-energy private residence client

"I like Paul Vick Architects' approach. It is integral to the way they have dealt with all our issues – from the strategic down to the small details – and is practical as well as creative. They have listened, explored and understood our needs. And at the same time they have ensured the architecture delivers for the surrounding area now and in the future. They have become the core for the project process making it more efficient for us, helping us manage a complex process."

Michael Chittenden, owner of Royal Ordnance Depot

"Paul Vick architects has interpreted our brief... in a very exciting way which will add a great deal. This is an important project for us and having Paul as our architect has been extremely positive especially in respect of his creative vision. Given the constraints of budget and programme achieving this vision is no mean feat and is one of the benefits of working with such a highly skilled architect."

Julie Tomkins, Head of Brentford School for Girls

"We needed help on 3 commercial projects, including in Leicester Square. Paul Vick architects responded quickly. Designs reflected our business plans and values, and on difficult sites."

Tak Tokumine, Founder of Japan Centre

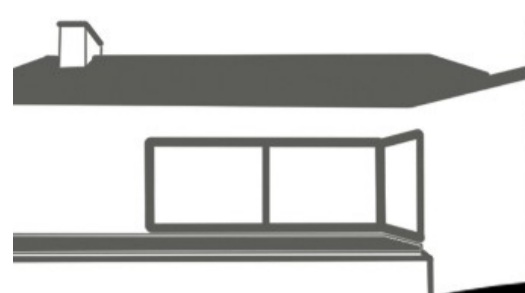

"Paul and his team were an excellent choice. We had a vision, and they added to our ideas and came up with solutions for any issues that arose. Our house now seems vastly bigger even though the footprint hardly changed, all achieved through good design.

We also had good peace of mind on planning permission with their 100% success rate. Our extension was a very smooth process, in very good hands. Would recommend."

Michael, private residence client

“Paul Vick Architects listened to our needs and provided an elegant and forward looking design for us. The complex task of achieving planning permission for a modern addition to a grade 2 listed building in Westminster was made surprisingly simple for us. Paul went several extra miles to achieve this and in a relatively short time.”

Neal Ashley, former chairman Amey Holdings

“Paul Vick is an inspirational architect and his skill in handling contractors was superb. Any problems we had were sorted out before they really became a problem. Comes highly recommended.”

Mary Partington, Bursar at Brentford School for Girls

“The judging panel deemed Paul Vick Architects head and shoulders above the competition. Their reputation within the industry is stellar and the precision with which the firm go about their projects is second to none despite being only 9 years old. The entire portfolio of work was believed worthy of recognition, which is why we felt they were deserving of a title that was not specific to one project, but the firm as a whole was worthy of praise.”

Judges comments on awarding Most Innovative Architecture Firm 2016 to Paul Vick Architects

“Paul Vick Architects understood what was needed for our site to bring customers into our store. They discussed our brief, respected our budget and came up with something that is light, beautiful and shows off our products well. The proof is that revenues are above what we expected and our sales staff are fans.”

Graham Sterry, founder of Barbed

“Paul Vick is excellent, really excellent and very talented. Plus he genuinely listens to what you want and will give you as much or as little advice on the design side as you require. He has also been a great help in assisting with getting the project off the ground and does what he says, when he says. Brilliant and highly recommend him.”

Sam Atkinson, private residency client

“Paul’s handling of the project was brilliant and we have ended up with the most fantastic room which is practical and comfortable whilst providing a ‘wow’ factor for our home that everyone comments on. We would have no hesitation in recommending him.”

Shona Synnot, private residence client

“At the risk of sounding valedictory - which is not at all my intention - let me also add my thanks at this juncture for all you have done in preparing the project and seeing it through so efficiently and with such care to detail. We both ... have been very appreciative of this.”

David and Ingrid Griffiths, private residence clients

“Paul Vick architects have a refreshingly new approach to legacy - whether this is obtaining value for clients, interpreting clients’ architectural needs and always looking to make the cultural element relevant for today and tomorrow. From a Vision for the Diocese of London to a commercial solution to low energy, to producing highly technical work and effective planning permissions, the practice demonstrates a high level of flexibility and innovative thinking.”
